

Letter to the *Kansas City Star*
March, 2018

On March 24, close to one million people across America came together to protest a lack of sensible gun legislation. Many of the organizers were high school and college students who are our future. Here in Kansas City, 5000 people assembled at Theis Park. The League of Women Voters and several groups from Kansas and Missouri registered about 250 new voters there. Politicians, take notice! If you don't change your mind and pass sensible gun protection laws we WILL change your faces.

Sue Scholl
